VIN: JTDKN3DU7C0336743

Year: 2012 Make: TOYOTA Model: Prius

Number of Open Recalls: 1

NHTSA Recall Number: [14V053](#)

Recall Date: February 12, 2014

Manufacturer Recall Number: E0E

SUMMARY:

Toyota is recalling certain model year 2010 through 2014 prius vehicles. In the affected vehicles, the intelligent power module (ipm) inside the inverter module (a component of the hybrid system) contains transistors that may become damaged from high operating temperatures. If this occurs, various warning lamps will be illuminated on the instrument panel and the vehicle will have reduced power allowing it to only drive a short distance.

SAFETY RISK:

The vehicle may enter a fail-safe/limp-home mode that limits the drivability of the vehicle. The hybrid system could also shut down completely resulting in a vehicle stall, increasing the risk of a crash.

REMEDY:

Toyota will notify owners and dealers will update the software for both the motor/generator control electronic control unit (ecu) and the hybrid control ecu, free of charge. If an owner experiences a failure of the inverter before the vehicle receives updated software, the dealer will replace the inverter assembly with a new one at no charge. The recall began on march 21, 2014. Owners may contact Toyota at 1-800-331-4331.

RECALL STATUS: **Recall INCOMPLETE**

MANUFACTURER NOTES:

THIS RECALL DATA LAST REFRESHED: Sep 29, 2014
